Front End	Back End	Version Control	Frameworks	UI/UX
HTML5	Node.js	Git	React / Redux	Figma
CSS3 / SASS / LESS	REST	Github	Vue / Vuex	Wireframing
JavaScript (ES6)	SQL	SCRUM / Agile	Angular	Prototyping
WCAG2 Accessibility	NoSQL		Tailwind CSS	User Stories
Webpack / Parcel	Java		Bootstrap	

> Projects

Vocabulary App - [Demo](#) / [Code](#)

Vue, Vuex, Firebase, Words API

- Used the Words API to get definitions for randomly generated words.
- Handled authentication with Firebase.
- Mistaken words have a higher chance of appearing again until they're guessed correctly.
- Used a recursive function to ensure that a word would not be in the choices array twice.
- Cached definitions to make sure a word is not fetched twice from the API.

Webshop App - [Demo](#) / [Code](#)

React, Firebase, Tailwind CSS, PayPal API

- Anyone can order and pay for items with a Sandbox PayPal account.
- Registered users can upload their own items.
- The information of the user that ordered an item will be shown on the uploader's profile.

Music Rating App - [Demo](#) / [Code](#)

React, Redux, Firebase, Sass, Napster API

- Utilized the Napster API to search music.
- Recommends music with a similar genre to the entered music.
- Users can rate each music publicly.

Typing Game - [Demo](#) / [Code](#)

React, Gatsby

- Features different game modes (timed, word/sentence modes).
- Bonus points are given after typing a word/sentence without a spelling mistake.
